

Atlantic Health Human Resources Planning Study

Introductory Notes:

- The Atlantic Health Human Resources Association wants other jurisdictions and groups to build on work presented here, and liaise with the Association as to progress, new discoveries, and new approaches derived from this work as they move forward.
- The Population Health Research Unit (PHRU) of Dalhousie University is suggested as a contact for basic technical information and to explore further collaborative work concerning the model. Any of the stakeholders listed on the Executive Summary report may also provide further information or propose further collaborative work in this area.
- Only the general simulation model is provided for download at this time.
- A demonstration database to maintain an inventory of education and continuing education programs was developed as part of the study. No related files are provided at this time.
- Please direct any inquiries to the Council of Atlantic Premiers, Attn: Charles Ayles. Contact information is available at <http://www.cap-cpma.ca/>
